

Midnight moon

Phase 4

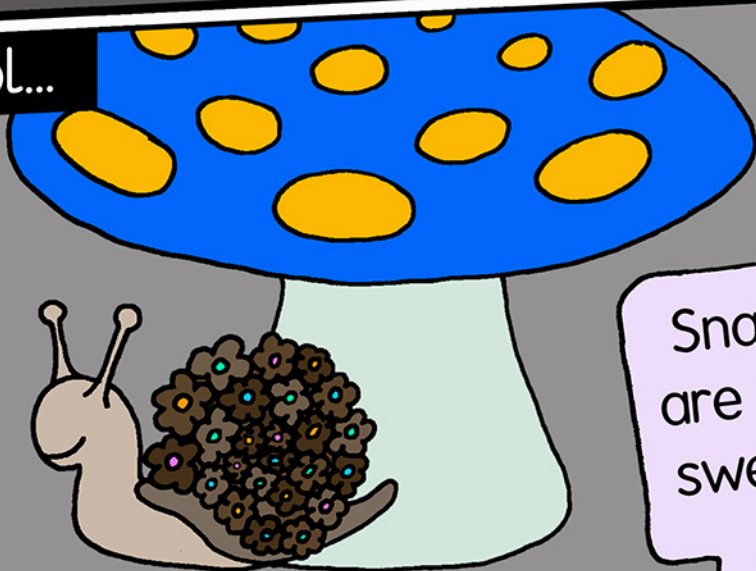

Let's go hunting for critters in the dark.

I will get my boots on.

Under the toadstool...

I can see a sweet brown bloom snail.

Snails are not sweet.

At the bottom of the big brown tree trunk...

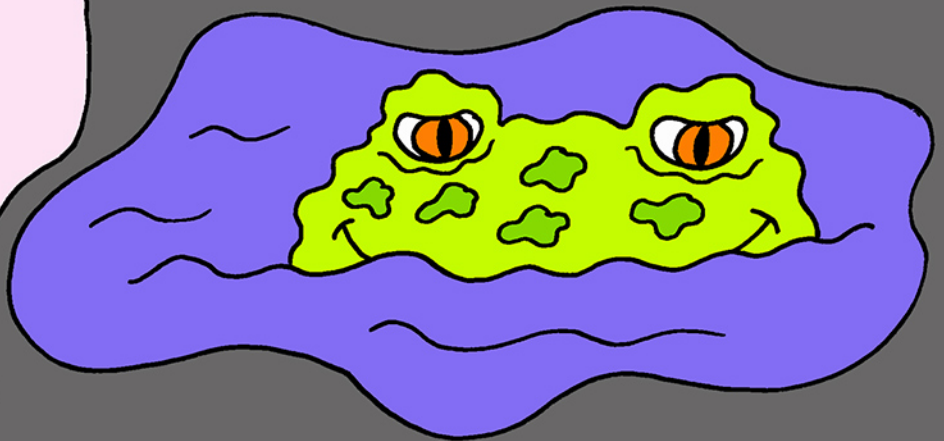

A flashing floss bug. Cool!

It is so bright that I do not need my torch.

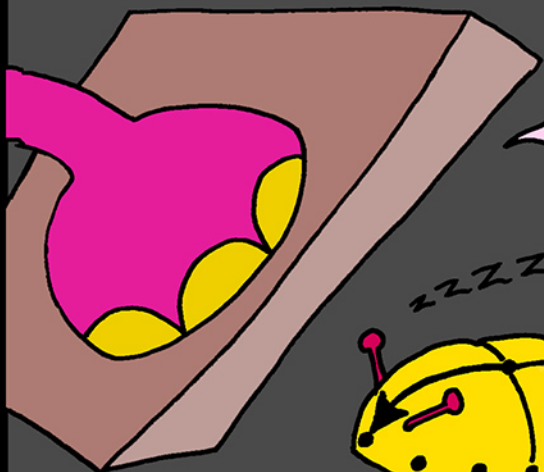

Floating in the pond...

It is a bright green blob frog that is oozing with thick gloop.

In a dark corner...

Can you see a critter under this flat brick?

tick tock

It is a sleeping clockroach.

I am starting to nod off too.
Good night
sleep tight.
